

# Applied Management – Entrepreneurship

 School of Business

## Advance your career in business management

LWTech's Bachelor of Applied Science (BAS) in **Applied Management – Entrepreneurship** prepares graduates to be small business owners or independent contractors/consultants. Graduates will also prepare to work as managers in technical fields related to their associate's degrees. They will also be ready to pursue graduate education at the Master's level in related business management majors.

As part of LWTech's School of Business, BAS in **Applied Management – Entrepreneurship** degree is designed for students who have received their applied associate's degree in a professional-technical discipline, and are seeking to advance or change their careers.
