

# Computer Security and Network Technology

 School of Information  
Technology

## Obtain sought-after tech support skills

Students in the **Computer Security and Network Technology** (CSNT) program at Lake Washington Institute of Technology (LWTech) gain skills to build a successful career in the information technology industry. This hands-on two-year program covers a wide variety of IT training, including troubleshooting physical and virtual networks, operating systems and data security. Students will train for today and tomorrow's Information Technology (IT) challenges and learn what it takes to build a successful career in the ever-growing, in-demand field of IT.

The full time CSNT program is now an evening hybrid format. This will allow students that work daytime jobs or internships while working on their CSNT AAS degree.
