Combine creativity and cutting-edge technology

The Design program at LWTech offers a variety of degrees and certificates including a Bachelor of Applied Science in Design (BAS), Associate of Applied Science-Transfer (AAS-T), and certificates in Digital Publishing, Web and Mobile Design, and User-Centered Design.

The Design department utilizes curriculum that emphasizes solving problems, industry-standard software, best practices, and personal expression in a fast-paced and ever-changing design industry. The program has a workforce focus. Emphasis is placed on real-world projects, deadlines, solving design problems, and focusing on the end user.
Program Highlights

- Analyze and create visual solutions to produce websites, content for mobile devices, design layouts and interactive documents for print and/or screen-based publishing industries
- Curriculum incorporates the concepts of user-centered design, human centered design, user experience (UX) design, and user interface (UI) design
- Illustration combines visual arts courses with design courses, students will complete foundation courses in drawing, painting, photography, and Adobe Creative Suite
- Conduct industry research to identify career pathways, and learn professional practices including copyright, file management, portfolio development and workplace ethics
- Students culminate their learning experience with a showcase of their portfolio to industry professionals
