

# Digital Gaming & Interactive Media

 School of Design & Applied Arts

## Make games and earn a degree

Lake Washington Institute of Technology (LWTech) is the only public college in the Northwest to offer an associate degree and applied bachelor's degree in **Digital Gaming & Interactive Media**. The program prepares students to work in professional studios and supports students who build their own indie games.

**These hands-on, production-oriented programs** are taught by experienced industry professionals to prepare students for careers in video game development, interactive media, marketing, advertising, education, industrial simulation, and virtual reality. **Courses cover a broad range of skills** including traditional art, 3D modeling, programming, level design, technical art, animation, user interface, game mechanics and project management.
