

# Biomedical Device Assembler Certificate

*Begin a career in a high technology industry manufacturing lifesaving equipment.*

## Obtain a career in two quarters

The Biomedical device assembler is a short two quarter certificate designed for students who desire an entry-level assembly job in the healthcare technology fields with a focus on medical devices equipment manufacturing.

Thanks to the strong relationship of LWTech with several industry partners; the program's curriculum is designed to provide students with the most relevant and direct needed skills that will make them successful in assembling bio-medical equipment products, the proper installation of electronic, optical, and mechanical components, quality inspection and auditing, product finishing, reading blueprints and engineering drawings schematics, while also learning lean manufacturing processes.

This program is focused on evening courses, thus allowing individuals who are currently employed to upgrade their skills.

**Admission Dates:** Spring, Fall
