

Environmental Horticulture

 School of Design
& Applied Arts

Science based.
Industry centered.
Hands-on learning.

The **Environmental Horticulture** program at LWTech provides high quality instruction and hands-on learning experiences in the field of horticulture.

Two, three and four quarter certificates are offered as well as an AAS degree. Programs focus on organic, sustainable approaches to growing and landscape management. This is a **cohort program** by design, which allows students to follow the same classmates and instructor together until graduation.

Students have **hands-on experience** in a classroom that includes two greenhouses and a study arboretum. Students gain skills working directly with clients and professionals in the industry.
