

# Public Health

 School of Health Sciences

Want to help **your community?**

Our **Bachelor of Applied Science in Public Health** degree gives students a strong public health foundation and essential analytical and teamwork skills to pursue careers as community health educators, health service consultants, research coordinators, patient care professionals, and related fields.

Our program is designed for students who already have an associate degree (from any background) or 90 equivalent college credits. If you're not sure you have this, come meet with us, and we can help you.

## Program Highlights

- **This program can be completed 100% online while you work, with classes held online two evenings a week.**
- We offer small class sizes, taught by working public health professionals and award-winning faculty.
- **Graduates from our program work at the State Health Department, local health jurisdictions, healthcare facilities, clinical research centers, and non-profit organizations.**
- Graduates from our program have been accepted into graduate school degree programs, including at the University of Washington.
- **There is no application fee to apply. Low textbook costs. Financial aid and scholarships are available.**
- Full-time and part-time options are available.
- **Out-of-State students can apply for a tuition waiver which covers the majority of the difference in cost between WA students and residents from other states.**
