

# Sewing

 School of Design  
& Applied Arts

## Master the skills in sewing and design

The [Sewing program](#) at Lake Washington Institute of Technology (LWTech), prepares students to independently create items made from textiles. Students will learn proper machine and tool usage, textile types and constructions and various techniques for assembling their creations. For their Certificate of Completion, students can choose a path in quilting or garment construction.

Sewing classes at LWTech provide training that lead to jobs in dressmaking, costuming, fabric or craft salesperson, manufacturer representative or online entrepreneur. Upon completing the certificate, students will have gained the skills required to construct textile-based projects using a variety of techniques.
