

REVIEW AREA FOR MATH PLACEMENT

Welcome to Lake Washington Institute of Technology!

One of the first things you need to do as part of the registration process is to decide which math class you should start in!

If you have been a high school student in the past 2 years OR have attended college and taken a math course before, please see an advisor right away to review other math placement options!

Otherwise, you'll first need to do a few math problems in the Assessment Center. This will give you an idea of what level you would be comfortable registering for – and serve as a starting point for a discussion with your advisor. We want you to find a class where you will be challenged, but not overwhelmed!

Before coming in to the Assessment Center, it is helpful to get an idea of what the computer software will look like and what types of problems to expect. We have set up an area where you can get comfortable with the format – and get a little math review practice while you are at it!

Start by going to www.wamap.org

Registering

At the Login page, click the "Register as a new student" link on the right side of the webpage. You will be asked to provide:

- A username. You may want to use your student ID number.
- A password. You'll be asked to enter this twice.
- Your First Name and Last Name
- Your email address

Agree to the terms of use. Then enter the following Course ID and Enrollment Key

Course ID = 14741

Enrollment Key = new@lwtech

When you click "Sign Up", you will be taken back to the Login page so you can log in

Logging In

At the Login page, you will be asked to supply your login credentials (username and password). Under "Courses you're taking" you should see PREPARING FOR PLACEMENT. Click on that link to get into the review/practice area.
